

AYAN PATEL

(213) 871-9951 | Los Angeles, CA | ayanpatel_98@yahoo.com | linkedin.com/in/ayanpatel98 | ayanpatel98.github.io

EDUCATION:

University of Southern California, Los Angeles, CA

Jan 2022-Dec 2023

Master of Science in Computer Science

GPA 3.50/4.0

Courses: Analysis of Algorithms, Database Systems

Gujarat Technological University, India

Aug 2015-May 2019

Bachelor of Engineering in Computer Engineering

GPA 9.19/10.0

Courses: Data Structures, Algorithm Design and Analysis, Operating Systems, Artificial Intelligence, DBMS, OOP Principles

TECHNICAL SKILLS:

Languages: Python, Java, C++, HTML, CSS, JavaScript, TypeScript, SQL

Databases: MySQL, Oracle Database 12C, PostgreSQL

Libraries and Frameworks: Angular 7+, Angular Material UI, Bootstrap, Flask, RxJS, NumPy, Pandas, NetworkX, Sklearn, NLTK, Scikit-learn, Matplotlib

Tools: NodeJS, GIT, JIRA, GitHub, NPM, Swagger UI, Visual Studio Code, Eclipse, Jupyter notebook

Methodologies: Agile

WORK EXPERIENCE:

Project Engineer, Wipro Ltd., India

Jul 2019-Nov 2021

- Developed single page application for budget estimate/expenditure of Gujarat state and for payroll of 185K+ Gujarat state govt. employees using Angular 10, Angular material UI, Typescript, HTML5, CSS3, Bootstrap 4 along with API integration.
- Involved in complete Software Development Life Cycle including Requirement Analysis, Design, Implementation, and Testing and followed AGILE methodology.
- Worked in both prototyping and development phase for UI designing and API integration respectively.
- Worked on manipulation of Observable/Promise data received from REST API calls.
- Designed various abstract interfaces and classes to construct business logic.
- Solved build time errors and performed build deployment and code refactoring for older designs.

PROJECTS:

Social Network (Instagram) Graph Link Prediction (*Python, Pandas, Networkx, Sklearn, NumPy*)

- Predicted missing links/edges in graph based social network to recommend a user to other user.
- Aligned the problem to a supervised learning problem based on graph based features like Page Rank, Adamic/Adar Index, etc., on 1.83M user's data.
- Used F1-score and binary confusion metric as performance metric.

Stack Overflow Question Tag Prediction (*Python, Scikit-learn, Pandas, Sklearn, NumPy, NLTK*)

- Predicted relevant tags for question based on its title and description, which are helpful in getting answers from respective technology experts.
- Mapped the problem as multilabel classification problem and used Logistic Regression to predict tags for each question.
- Accomplished Feature engineering and did data preprocessing by performing stemming, removing stop words, etc.

Quora Question Pairs (*Python, Pandas, Sklearn, NumPy, NLTK*)

- Developed a model to classify whether question pairs are duplicates of each other or not.
- Utilized key performance Indicator as LogLoss and secondary metric as Binary Confusion metric, also achieved LogLoss 0.35 on test data.
- Carried out data preprocessing and featurization task.

Video Rental Inventory System (*Java, Oracle Database 11C, Eclipse*)

- Developed a Java application, for video rental store, capable to manage video inventory as well as maintain customer profile in RDBMS schema.
- Executed CRUD operations such as add/remove customer profile, sell/rent video, receive rating from customer etc.

LEADERSHIP & INVOLVEMENT:

- Led a team of 8 coordinators for Computer Engineering Students Association in organizing and initiating Coding fest events for university students that greatly improved my leadership and communication skills.

HONORS & AWARDS:

- Received Academic Excellence Award (cert. by NASSCOM) for being top ranked student in Computer Engineering stream in the university from Shri Dewang Mehta I.T foundation for academic year 2017-18.
- Awarded Certificate of Academic Excellence 2016-17 for second rank in Computer Engineering department of our college.

ADDITIONAL INFORMATION:

- U.S Permanent Resident (Green Card holder - No visa sponsorship required)
